THE WORLD BIBLIOGRAPHICAL SERIES

This series, which is principally designed for the English speaker, will eventually cover every country (and many of the world's principal regions), each in a separate volume comprising annotated entries on works dealing with its history, geography, economy and politics; and with its people, their culture, customs, religion and social organization. Attention will also be paid to current living conditions – housing, education, newspapers, clothing, etc.– that are all too often ignored in standard bibliographies; and to those particular aspects relevant to individual countries. Each volume seeks to achieve, by use of careful selectivity and critical assessment of the literature, an expression of the country and an appreciation of its nature and national aspirations, to guide the reader towards an understanding of its importance. The keynote of the series is to provide, in a uniform format, an interpretation of each country that will express its culture, its place in the world, and the qualities and background that make it unique. The views expressed in individual volumes, however, are not necessarily those of the publisher.

464 **The student africanist's handbook. A guide to resources.**
Gerald W. Hartwig, William M. O'Barr. New York, London: Schenkman, 1974. 152p. (A Halstead Press Book).

Chapters on the nature of African studies and on understanding Africa are followed by a bibliography of reference sources. General subject areas and a country by country section are featured, together with a chapter on aids for intensive research. Age has unfortunately reduced the usefulness of this work.

465 **US imprints on Sub-Saharan Africa: a guide to publications catalogued at the Library of Congress.**
Washington, DC: Library of Congress, African Section, 1986- . annual.

A listing of titles catalogued the previous year, along with title and subject indexes. The Library of Congress probably has the fullest collection of material on Burundi outside the country itself, collecting locally-produced duplicated material. The Library of Congress catalogue is available through computer network services and a search from such a service probably provides the fullest bibliography of complete books (although not periodical articles or essays) available.

466 **A world bibliography of African bibliographies.**
Theodore Besterman, revised by J. D. Pearson. Oxford: Basil Blackwell, 1975. 241 columns.

The first section guides the reader to general bibliographies and catalogues. The second section, arranged by country, omits Burundi, although there is a section on East and Central Africa.

Indexes

There follow three separate indexes: authors (personal and corporate); titles; and subjects. Title entries are italicized and refer either to the main titles, or to other works cited in the annotations. The numbers refer to bibliographic entry rather than page numbers. Individual index entries are arranged in alphabetical sequence.
